

BOSTON APPLICATION SECURITY CONFERENCE

The bearer of this certificate attended the following presentation on **Saturday, April 5, 2025, from 9:30 AM to 11:45 AM** at the Microsoft Technology Center, 5 Wayside Road, Burlington, MA 01803.

Workshop - API Underworld: Red Team Hacking Secret – Parth Shukla

Agenda: This comprehensive workshop is designed to provide participants with a deep understanding of API security, its challenges, and best practices to mitigate risks. Spanning six engaging sessions, the program begins with an introduction to API security and real-world breaches, highlighting the critical importance of securing APIs. Participants will explore reconnaissance techniques, including using tools like Shodan and Google Dorking, to identify API endpoints. The workshop delves into common API vulnerabilities hands-on scanning with Burp Suite. Additionally, the sessions cover OSINT (Open Source Intelligence) techniques with tools like Wayback, empowering attendees to gather intelligence on API targets. The program culminates with guided vulnerability exploitation exercises and a collaborative group activity to identify and exploit API flaws. Concluding with a wrap-up session and an open Q&A, this workshop equips participants with the knowledge and skills to secure APIs effectively while fostering a hands-on learning environment.

Please retain this certificate as evidence of your attendance at this presentation and submit a claim for **TWO CPE CREDIT** in accordance with the guidelines of your certifying organization.
