BOSTON APPLICATION SECURITY CONFERENCE

The bearer of this certificate attended the following presentation on **Saturday, April 5, 2025, from 10:00 AM to 11:00 AM** at the Microsoft Technology Center, 5 Wayside Road, Burlington, MA 01803.

TALK -Securing Access: Leveraging IGA, JIT & Policy Controls to Tackle OWASP Threats – Saai Krishnan Udayakumar & Dilip Mandadi

Agenda: Modern applications are relentlessly targeted by sophisticated attackers who continuously seek vulnerabilities to exploit, and among the most critical is Broken Access Control—a vulnerability that has earned its place as a top concern in the OWASP Top 10. Simultaneously, the emerging risk of Improper Offboarding of Non-Human Identities, identified as NHI1:2025 in the new OWASP Non-Human Identities Top 10, presents an additional challenge. These issues extend far beyond compliance checklists, touching on the very heart of how access is managed across diverse systems. In today's session, "Securing Access: Leveraging IGA, JIT & Policy Controls to Tackle OWASP Threats," we delve into these two pivotal areas by exploring the complexities of access management from multiple angles. This 45-minute collaborative presentation, featuring insights from two seasoned industry experts, aims to shed light on both the vulnerabilities inherent in broken access control and the often-overlooked risk posed by lingering, improperly decommissioned non-human identities. Our discussion will draw from extensive industry experience, real-world incidents, and emerging best practices, providing a comprehensive framework for understanding and addressing these critical security challenges.

Please retain this certificate as evidence of your attendance at this presentation and submit a claim for **ONE CPE CREDIT** in accordance with the guidelines of your certifying organization.
