BOSTON APPLICATION SECURITY CONFERENCE

The bearer of this certificate attended the following presentation on **Saturday, April 5, 2025, from 1:00 PM to 1:50 PM** at the Microsoft Technology Center, 5 Wayside Road, Burlington, MA 01803.

TALK - Unlocking Secure Development: A Deep Dive into OWASP ASVS – Tejpal Garhwal
Agenda: In this speech, I will explore the significance of the OWASP Application Security Verification Standard (ASVS) and why it is a game-changer for secure software development. We will begin by understanding why traditional security measures fall short and how ASVS provides a structured and scalable approach to security verification. I will break down the different ASVS levels (Level 1, 2, and 3) and explain how they cater to different application security needs—from basic security hygiene to high-assurance applications. Through real-world examples, I will illustrate how integrating ASVS early in the Software Development Lifecycle (SDLC) can reduce vulnerabilities, minimize risk, and ensure compliance with security best practices. Finally, I will discuss practical strategies for implementing ASVS within organizations, including how security teams, developers, and business leaders can collaborate to elevate application security maturity. By the end of this talk, the audience will have a clear roadmap to leverage OWASP ASVS effectively and embed security into development workflows, making security an enabler rather than a roadblock.

Please retain this certificate as evidence of your attendance at this presentation and submit a claim for **ONE CPE CREDIT** in accordance with the guidelines of your certifying organization.
